COMPANY PROFILE

Surface Preparation Specialists

For more than 30 years, Blastoff Surface Cleaning & Protective Coatings has delivered premium abrasive blasting, protective coating and industrial finishing solutions across Australia.

We specialise in preparing and protecting components where quality, durability and appearance matter.

Combining expert surface preparation with advanced coating technologies, we deliver long-lasting finishes that withstand Australia's harsh operating conditions.

From restoration projects through to industrial production, every job is completed with precision, reliability and pride.

FEATURED SERVICES

CERAKOTE®

Certified Cerakote applicator providing premium ceramic coatings for automotive, industrial, motorsport and engineering applications.

Exceptional resistance against:

- ✓ Heat
- ✓ Corrosion
- ✓ Chemicals
- ✓ Wear
- ✓ UV

POWDER COATING

Durable architectural and industrial powder coating delivering exceptional protection with premium cosmetic finishes.

Suitable for:

- ✓ Automotive
- ✓ Manufacturing
- ✓ Industrial Equipment
- ✓ Restoration
- ✓ Engineering Components

PHOSPHATING

Professional phosphating creates the perfect foundation for protective coatings by improving adhesion while significantly increasing corrosion resistance.

INDUSTRIES SERVED

 MANUFACTURING	 ENGINEERING	 MINING
 MARINE	 AUTOMOTIVE	 DEFENCE
 INFRASTRUCTURE	 COMMERCIAL	 AGRICULTURE
 INDUSTRIAL MAINTENANCE		

OUR DIFFERENCE

Most companies simply apply coatings.

Blastoff prepares every surface correctly before coating begins.

That commitment to preparation delivers longer coating life, superior adhesion and better long-term performance.

It is this attention to detail that has built Blastoff's reputation over more than three decades.

Talk to Blastoff about your next coating or restoration project. Our team can recommend the right surface preparation and protective coating system for maximum performance and durability.
